BOUNCE IMPLEMENT NETSUITE ONEWORLD

Eureka Solutions serves up a game-changer

Solution: NetSuite OneWorld

ORACLE + NETSUITE

About Bounce

Since its launch in 2012, the Bounce concept has been widely regarded by the industry as a game-changer in social entertainment venues. The two founders conceptualised a vision, taking inspiration from the explosion of stylish table tennis social venues stateside and the huge resurgence of interest in the game within the UK.

Reasons for choosing Eureka Solutions/NetSuite

Rapid growth meant Bounce needed a system that offered them accurate financial data and KPIs across all their worldwide venues. NetSuite OneWorld is a cloud based ERP system that easily manages multiple subsidiaries, business units & legal entities, while seamlessly handling different currencies, taxation rules and reporting requirements allowing Bounce to grow their business from start-up to international success.

Consolidated
global accounts

100% of
accounting has
been brought
in-house

International tax
and accounting
compliance

"The functionality NetSuite offered us to run our global businesses was unrivalled and Eureka Solutions' experience in implementing similar systems for other exciting international businesses made them our obvious choice."

Business Challenges

- Bounce outsourced their accounts management and bookkeeping
- As the business grew, they wanted to bring processes in-house
- Bounce wanted to gain more control and automation throughout the business

Results

- Introducing NetSuite has transformed Bounce's business
- The company are now able to drill down and report on their financial data in great detail
- Bounce now have access to their data anywhere, anytime
