NETSUITE ONEWORLD
Leading Practices for Your Global Business

The modern company must be data driven and innovative. It must scale rapidly and quickly respond to market dynamics and customers. To master these traits, it is critical for companies with multiple locations to have the right back-office technology in place. NetSuite's SuiteSuccess for OneWorld delivers a real-time, unified global business management platform for enterprises that manage multinational and multi-subsidiary operations—at a fraction of the cost of traditional on-premise ERP solutions.
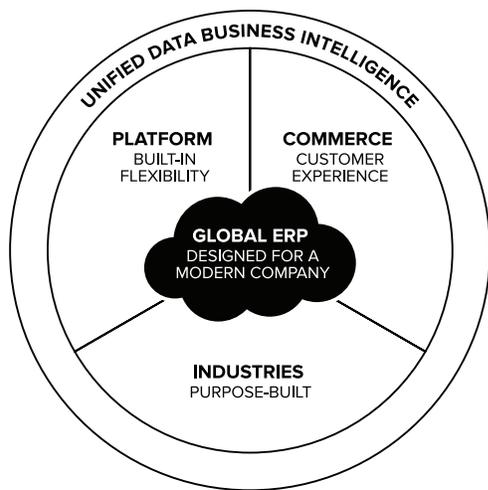

SuiteSuccess OneWorld Methodology

OneWorld provides organizations with a strong foundation to transform their business with pre-configured solution components.

- Real-time global business insight via role-based dashboards, allowing an accurate and instantaneous view of global business performance.

- Drill down capabilities into key metrics within an organization's global operations, eliminating the need for custom reports.

- Industry-based leading practices to help customers to rapidly meet their global business objectives and seamlessly grow and scale.

ORACLE® + **NET**SUITE

With thousands of successful OneWorld implementations, NetSuite has a deep understanding of global businesses and the obstacles they must overcome. SuiteSuccess OneWorld Leading Practices were developed with this experience and these challenges in mind to deliver value to customers immediately. As the pace of change accelerates, multinational and multi-subsidiary businesses often struggle with:

- Financial consolidation and visibility across multiple locations

- Multiple currencies and foreign exchange

- Global tax and compliance

NetSuite OneWorld at a glance

Number of countries in which deployed	160+
Number of languages supported	20
Number of currencies supported	190+
Number of countries in transactions	200+

OneWorld helps multinational companies automate multi-subsidiary operations and provides real-time visibility at the local, regional and headquarter levels. With support for over 190 currencies, 20 languages and customer deployments in over 160 countries, organizations can seamlessly meet the individual needs of local operations. Moreover, companies can develop and deploy standard business processes across all divisions and subsidiaries ensuring compliance throughout the global organization, all while meeting critical and time-consuming regulatory financial compliance requirements such as IFRS and US GAAP.

Why NetSuite OneWorld?
NetSuite OneWorld helps global businesses drive operational efficiency, delivering real-time visibility and consolidation, while providing the flexibility for customizations to corporate and subsidiary needs.

Manage Multiple Subsidiaries, Business Units and Legal Entities
NetSuite OneWorld gives corporate and division leaders a clear view into every level of business performance, from summary to detail, through comprehensive financial and operational role-based dashboards and real-time reports.

Run a Complete ERP System in the Cloud
NetSuite's cloud delivery enables global businesses to run both corporate and subsidiary operations without costly on-premise IT infrastructure and resources, cutting costs and enabling companies to efficiently extend standardized ERP to every corner of the business.

Consolidate Operations and Gain Real-Time Financial Visibility

NetSuite OneWorld accelerates the financial close with the use of a foreign currency revaluation process and also with the use of an automated intercompany journal elimination feature. In lock step, the process is clearly defined in all GL accounts and is visible from local in-country operations to global headquarters.

Run your Business from Anywhere

NetSuite OneWorld's web-based access enables your employees to access NetSuite from anywhere on the globe. With support for popular mobile devices, NetSuite OneWorld customers get access to the data and functionality they need from any location.

SuiteSuccess OneWorld Features

The backbone of NetSuite OneWorld is the Financials.

NetSuite OneWorld Financials provide a complete cloud financial management application for global businesses. With NetSuite OneWorld Financials, businesses can adjust for currency, language, taxation and legal compliance differences at the local level, regional roll ups and global business consolidation. NetSuite OneWorld provides real-time visibility into all aspects of the business using Dashboard Displays including a Subsidiary Navigator and Navigation Portlet. Both solutions will help ensure consistent and compliant management both locally and globally.

Global Accounting and Consolidation

NetSuite OneWorld is built around robust financial reporting capabilities that enable an organization to understand what is happening across the global business in real-time. In addition, NetSuite OneWorld provides a multi-language user-interface that helps bridge communication barriers and provides a flexible hierarchy that allows businesses to run their entire entity structure with ease. OneWorld is designed to provide an instant global view of the business with subsidiary specific drill-down

NetSuite OneWorld:
Global Accounting and Consolidation

allowing you to quickly understand what is going on anywhere in the world.

Comprehensive Multi-currency Management

NetSuite multi-currency management supports 190+ currencies and exchange rates, enabling you to do business with customers and vendors globally. NetSuite Advanced Electronic Bank Payments provides a wide variety of payment options including the support of 90+ bank payment formats. It provides real-time currency conversion and financial consolidation for all your global operations. With NetSuite OneWorld, you can manage and support a range of international tax requirements and to revalue currencies and consolidate financial reporting across all business units.

Audit and Compliance Reporting

NetSuite OneWorld has been built to support both global standard and country-specific requirements. The always-on audit trail, built-in analytics, access logs and workflow, and the ability to drill down to the underlying transaction detail ensure that you'll always get adequate supporting documentation. Further, pre-defined user roles and permissions can be easily updated and managed to support your own process requirements to help you meet the needs of compliance obligations.

Configurable Tax Engine

Recognizing the critical need for businesses to meet local indirect tax obligations wherever they do business, NetSuite OneWorld provides out-of-the-cloud pre-configuration to more than 50 countries. NetSuite also provides a built-in tax engine

that is configurable to specific business needs. NetSuite OneWorld natively enables businesses to calculate taxes in real-time on sales and purchase transactions and cross border sales, and Intrastat reporting obligations between EU countries and to file reports electronically, making the installation of standalone tax engine unnecessary for many businesses.

Summary

NetSuite OneWorld addresses the complex multinational and multi-company needs of organizations. It enables businesses to adjust for currency, taxation and legal compliance differences at the local level, with regional roll-up and global business consolidation. Business leaders get unprecedented visibility of their business worldwide in real-time, ensuring consistent, compliant management across the organization, locally and globally. In addition to providing global accounting/ERP solution, NetSuite OneWorld offers global Customer Relationship Management (CRM), ecommerce and Professional Services Automation (PSA) solutions, enabling multinational businesses to align operations across finance, marketing, commerce, sales and service.
