

EUREKA SOLUTIONS HELPED NEOGEN

Sow the seeds of success

Solution:
Sage 200, Sales Order Plus & Bespoke Development

sage 200

About Neogen

Neogen Europe Ltd. are a high-tech organisation dedicated to the development and marketing of novel diagnostic kits. These kits are designed to focus on concerns regarding the safety of food and agricultural products, from the quality of the seeds sown, to the safety of every stage of the food manufacturing process.

Reasons for Choosing Eureka Addons/Bespoke Development

After Neogen visited a Eureka Solutions customer, they enlisted us to plan and setup their new system. We concluded that Sage 200 would be the solution best suited to their growing organisation. This platform offered the enhanced flexibility and visibility the business required and we would be able to tailor the platform to allow them to achieve their business goals.

Customised system to suit processes

Clear visibility and reporting of performance

Removal of duplication of work

Business Challenges

- Outgrown Sage 50 Accounts
- Unable to cope with growing levels of transactions
- Duplication of work
- Difficulties with data analysis

Results

- System created to support growth
- Customisation has streamlined processes
- Increased staff productivity
- Information easily accessed throughout the organisation

“Eureka Solutions was selected over other business partners as they had the skills to tweak and develop the software which ensured I never heard the statement ‘the software won’t do that’.”
